

# Westlink M7 Bike Repair Station

Here at Westlink M7, we are excited to announce that a new bike repair station has been installed next to the bubbler on the Westlink M7 shared path in Eastern Creek. We hope this bike repair station will allow the path to be used by all!

The bike repair station features wrenches, screwdrivers, tire levers and an air pump.

- **Wrenches:** nearly every bicycle in use today will require wrenches to adjust handlebars, stems, saddles and axle systems.
- **Screwdrivers:** most hardware on bikes that require a screwdriver will be a Phillips, but sometimes a flat head screwdriver will be more effective.
- **Tire Levers:** this tool will help you remove the tire from the rim when you need to change the flat inner tube.
- **Bike Pump:** the bike pump will ensure you are able to pump up your tyres when they are flat.

We hope the bike repair station will allow you to stay safe on the path!

If you see something amiss with the bike station, please report it to us on telephone **9834 9200** or email **info@westlinkm7.com.au**.
