

Westlink M7 Widening

Westlink M7 Motorway near Cowpasture Road, Len Waters Estate

Transport for NSW is proposing to support the future Western Sydney Aerotropolis and the surrounding growth areas to increase capacity and widen the Westlink M7.

The Westlink M7 is a key transport route for Greater Sydney, and it regularly experiences congestion.

Transport for NSW proposes to widen the Westlink M7 within the existing median by adding one lane in each direction. The widening would occur between the M5 interchange at Prestons, approximately 140 metres south of the Kurrajong Road overhead bridge and the Westlink M7 bridge at Richmond Road in Oakhurst/Glendenning.

Once complete, there would be three lanes of traffic in each direction. The widening would not occur through the Light Horse Interchange at the M4 Motorway.

[Upcoming consultation on the proposal](#)

Transport is preparing a Modification Report to assess the potential impacts of the proposed Westlink M7 widening and how Transport will mitigate and manage impacts on the community and surrounding environment.

The Modification Report display is your opportunity to have your say on the Westlink M7 widening. We will keep you informed and write to you again to tell you when the Modification Report is being displayed for feedback.

Once the consultation period is closed, Transport will review and respond to feedback before the Minister for Planning decides on the widening proposal.

Investigation work

We will investigate ground conditions within the median of the Westlink M7 over **36 nights shifts** between **Friday 24 June** and **Sunday 7 August**, weather permitting.

Our work hours will be between **9pm** and **5am**, **Monday** to **Saturday**. We will spend no more than two night shifts in a row in one area.

Our work needs to be carried out at night to minimise traffic disruption and reduce safety risks to our workers and motorists. The investigation work may be noisy at times, but we will do everything we can to minimise its impact, including completing noisier tasks by midnight.

There will be some temporary traffic changes during our work hours to make sure the work zone is safe. For the latest traffic updates, you can call **132 701**, visit livetraffic.com or download the Live Traffic NSW App.

We apologise for any inconvenience and thank you for your patience during this work.

Benefits of widening the Westlink M7

- Eased congestion by enabling faster and more reliable connections between Sydney's South West and North West
- Better and more reliable trips for people, businesses, and freight
- Improved journey times to planned growth areas and the new Western Sydney International (Nancy-Bird Walton) Airport.
